

2006-2008 Hamlet of Boiceville Catskill Watershed Corporation Community Wastewater Management and Stormwater Retrofit Programs

This \$10.5M project consists of construction of a new community wastewater collection system, pumping station, wastewater treatment plant and stormwater collection system improvements for a community in the West of Hudson New York City Watershed, situated along the Esopus Creek in the Catskill Mountains, a tributary to the NYCDEP Ashokan Reservoir. Engineering services are being provided for all phases of the project as follows:

- ◆ Preliminary Engineering Reports
- ◆ Final Design and Specifications
- ◆ Bidding Assistance
- ◆ Construction Administration
- ◆ Construction Observation
- ◆ Preparation of and Assist with Securing Easements
- ◆ Preparation of Operation and Maintenance Budgets and Agreements

The major components of the project are expected to include the following:

- ◆ 8" PVC Collection Sewers with Lateral Stubs
- ◆ 4" HDPE Force Main and Pump Station
- ◆ Small Grinder Pumping Stations
- ◆ 12"– 24" CPP Stormwater Collection Sewer Replacement
- ◆ Stormwater Treatment Facilities
- ◆ 0.075 MGD Wastewater Treatment Plant with Microfiltration
- ◆ Sludge Dewatering and Handling Facilities
- ◆ WWTP Outfall Sewer to Esopus Creek – Tributary to NYCDEP Ashokan Reservoir
