

## 2005-2006 Town of Prattsville NYCDEP New Infrastructure Program Wastewater Project

This \$8.2M project consisted of construction of a new community wastewater collection system, pumping station and wastewater treatment plant for a community in the West of Hudson New York City Watershed, situated along the Schoharie Creek, a tributary to the NYCDEP Schoharie Reservoir. Engineering services were provided for all phases of the project as follows:

- ◆ Preliminary Engineering Reports
- ◆ Final Design and Specifications
- ◆ Bidding Assistance
- ◆ Construction Administration
- ◆ Construction Observation
- ◆ Preparation of and assist with securing easements

The major components of the project included the following:

- ◆ New 8" and 10" HDPE Collection Sewers
- ◆ New 8" HDPE Force Main to new WWTP
- ◆ Pump Station Buildings
- ◆ Stream Crossing – Schoharie Creek
- ◆ 0.086 MGD Wastewater Treatment Plant with microfiltration
- ◆ Emergency Generator
- ◆ WWTP Discharge Terminus at Schoharie Creek – Tributary to NYCDEP Schoharie Reservoir
