

## 2001 Warnerville Water District Town of Richmondville Water System Project

This project entails the construction of approximately 23,000 feet of water main, a new 0.25 MG pre-cast wire-wound concrete storage tank, and a new control building housing booster pumps, chlorination equipment, and the control and telemetry system. The project funding include two New York State Legislature Member Item grants totaling \$60,000, a \$785,000/\$75,000 grant/loan package from USDA Rural Utilities Service, and a \$1,541,000 loan from New York Drinking Water State Revolving Fund for a total project budget of \$2.461M. Engineering and Planning services provided for the project include:

- ◆ Preliminary Engineer's Report
- ◆ Environmental Review Assistance
- ◆ Water District Creation Assistance
- ◆ Funding Application
- ◆ Engineer's Report (Facility Plan)
- ◆ Land and Easement Acquisition
- ◆ Final Design and Specifications
- ◆ Water Supply Permit Application
- ◆ Bidding Assistance
- ◆ Construction Administration
- ◆ Full-time Construction Observation

The major components of the project include:

- ◆ New Water Transmission Main
- ◆ New Water Distribution Mains
- ◆ New Control Building
- ◆ New Control & Telemetry System
- ◆ New Storage Tank

The Warnerville Water District will serve a population of 400 people and has a projected average daily water consumption of 70,000 gpd.
