

2006-2007 Village of Whitney Point Wastewater Project

This \$8.3M project consists of the development of a new 150,000 gpd wastewater collection and treatment system consisting of approximately 36,000 LF of gravity sewer to serve a population of 1100. Engineering services for this project include the following:

- ◆ Conceptual Design of System Components
- ◆ Funding Applications
- ◆ Land Acquisition Assistance
- ◆ Facility Plan of Proposed Facilities
- ◆ Permitting Services
- ◆ Final Design and Specifications
- ◆ Bidding Assistance
- ◆ Construction Administration
- ◆ Full-time Construction Observation

The major components of the project include the following:

- ◆ Wastewater Collection System
- ◆ Pumping Stations
- ◆ Sequencing Batch Reactor (SBR) Treatment Plant
- ◆ Hypochlorite Disinfection System
- ◆ Sludge Handling Facilities
- ◆ Control Building
